SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/07/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/656,576	Applicant(s) KIM ET AL.	
	Examiner Regina Liang	Art Unit 2629	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 August 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 and 2 is/are rejected.
- 7) ☒ Claim(s) 3, 4 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This Office Action is responsive to amendment filed 8/28/06. Claims 1-4 are pending in the application.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda (US Patent No. 4,393,405) in view of Ozawa et al. (US Patent No. 6,839,045)

As to claim 1, Ikeda discloses a liquid crystal display (Fig. 1) comprising: thin film transistors (102) connected to intersections between a plurality of data lines (D1...Dn) and a plurality of gate lines (G1...Gm); pixel electrodes (e.g., top portion electrode of the LCD cell 104), each of which is connected to a source of each of the thin film transistors; common electrodes (e.g. bottom portion electrode of the LCD cell 104) opposed to the pixel electrodes; liquid crystal (104) injected between the pixel electrodes and the common electrodes. It is noted that Ikeda does not disclose a plurality of auxiliary gate lines corresponding to the gate lines, and first capacitors, each of which is connected between the source and each of the auxiliary gate lines.

Ozawa is cited to teach an active matrix flat panel display similar to Ikeda. Ozawa further discloses a plurality of auxiliary gate lines (e.g. cline line as shown in Fig. 2), each of the auxiliary data lines having a signal with a polarity that is opposite to the polarity of a signal on a

Art Unit: 2629

corresponding gate lines (col. 25, line 48 to col. 26, line 3 for example), and first capacitors (e.g. cap as shown in Fig. 2), each of which is connected between the source and each of the auxiliary gate lines (see Fig. 2). It would have been obvious to one of ordinary skill in the art to have modified Ikeda with the features of the auxiliary gate lines as taught by Ozawa because the capacitor connected to the auxiliary gate line can maintain the pixel voltage even the transistor is turned "off" (see col. 9, lines 50-67).

As to claim 2, Ikeda as modified discloses a second capacitor 103) is connected between the source and each of the common electrodes (e.g. the capacitor 102 is connected to the common electrode of the pixel in the same common line as shown in Fig. 2).

Allowable Subject Matter

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 8/28/06 have been fully considered but they are not persuasive.

Applicant's remarks on pages 4-5 regarding Ozawa are not persuasive. Ozawa teaches a plurality of auxiliary gate lines (e.g. cline line as shown in Fig. 2), and col. 25, line 48 to col. 26, line 3 of Ozawa teaches each of the auxiliary data lines having a signal with a polarity that is opposite to the polarity of a signal on a corresponding gate lines.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Regina Liang whose telephone number is (571) 272-7693. The examiner can normally be reached on Monday-Friday from 8AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on (571) 272-7691. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
